

A METHOD AND SYSTEM FOR RESPONSE BUFFERING IN A PORTAL
SERVER FOR CLIENT DEVICES

ABSTRACT OF THE DISCLOSURE

5 A method and system for implementing response buffering in a
portal server. The method includes the step of receiving a request from a
client device for content. The type of the client device is identified by
processing the request. The content is buffered in accordance with the
type of the client device. The content is then transmitted to the client
10 device in response to request, wherein the content is formatted in
accordance with the type of the client device.
